RMT/ICT Final Test and Calibration Procedure

Prior to implementing the procedure, read this document in its entirety.

- 1.0** Start "DWM1000 Test.exe" application on test station.
- 2.0** Plug RMT or ICT Digital and RF PCB assembly (DWM1000-01 and DWM1000-02 or DWM1000-04 and DWM1000-05) into DWM1000-93 test fixture.
- 3.0** Move the DWM1000-93 power switch to the ON position.
- 4.0** Select the "Start" button in the "DWM1000 Test" application window.
- 5.0** If the test result is "FAILED" move the DWM1000-93 power switch to the "OFF" position and submit the RMT assembly for repair.
- 6.0** If the test is "SUCCESSFUL", move the DWM1000-93 power switch to the "OFF" position and apply the Serial Number/FCC ID Label.
